Sendangadi, Kecamatan Mlati, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55285

Final year Computer Science student with focus on AI development, deep learning, and data analysis. As a proud graduate of Bangkit Academy and PIMNAS alumnus, I have led innovative projects MindCura, an AI-powered mental health assistant. Proficient in Python, TensorFlow, and PyTorch, with a strong passion for leveraging AI to build impactful, data-driven solutions.

Work Experiences

PT GITS Indonesia - **Bandung, Indonesia** Dec 2024 - Present

AI Engineer

PT GITS Indonesia is a technology company specializing in software, web, and mobile application development to help businesses transform digitally.

- Building an interactive AI Humanoid avatar with speech-to-text and text-to-speech capabilities.
- Create multi agent AI using RASA with Gemini API integration.
- Build multi agent ai with CrewAI to support the program to automatically analyze dynamic documents and create agents according to document processing needs.

MindCura - **Sleman, Indonesia** Apr 2024 - Present

Team Lead & AI Engineer

MindCura is a technology company developing innovative AI-driven mental health solutions. Funded by Kemendikbudristek, we integrate AI and AR to help individuals manage and improve their well-being.

- Led the development of MindCura, an AI-driven mental health assistant integrating multimodal AI (CNN, LSTM, LLM) for sentiment analysis and personalized recommendations.
- Designed and optimized machine learning pipelines using TensorFlow and Hugging Face Transformers for improved accuracy and scalability.
- Collaborated with psychologists and engineers to align AI solutions with mental health standards.

Bangkit Academy led by Google, GoTo, & Traveloka - **Jakarta, Indonesia** Sep 2024 - Dec 2024

Machine Learning Cohort

Bangkit is a unique career readiness program led by Google and delivered with support from industry experts from our industry partners like Google, GoTo, and Traveloka.

- Designed and implemented a TensorFlow-based MobileNetV2 model, optimized with TensorFlow Lite (TFLite) for efficient waste classification on low-spec devices, ensuring real-time performance.
- Utilized Vertex AI to deploy machine learning models seamlessly, optimizing workflows for faster experimentation and scalable solutions.
- Collaborated in a multidisciplinary team, integrating AI solutions into scalable applications.

Radboud University - **Nijmigen, Belanda** Nov 2023 - Feb 2025

Research Assistant

Collaborating with Chaidir Arsyan Adlan, I focused on conducting Geospatial Data Analysis to study land use changes, including shifts in vegetation types and human activities such as agriculture, plantations, forestry, and open lands.

- Conducted geospatial data analysis using Python tools like Xarray and Dask, focusing on land-use changes.
- Built and optimized data pipelines to handle large-scale datasets efficiently.
- Visualized findings with Matplotlib and Seaborn, providing actionable insights into vegetation and human activity trends.

Universitas Teknologi Yogyakarta - **Sleman, Indonesia** Sep 2023 - Jan 2024

Assistant Lecturer

I had the opportunity to serve as a teaching assistant for undergraduate students, specifically for Object-Oriented Programming (OOP) using Python.

- Assisted in teaching Object-Oriented Programming (OOP) with Python.
- Evaluated students' performance and conducted practical coding sessions.

PT. Simbolik Impera Dunia - **Yogyakarta, Indonesia** May 2023 - Jul 2023

Python Developer

Symbolic ID is a combination of social media and knowledge management platforms, in which discussions, studies, and other products of science that benefit the general public are prompted.

- Developed backend systems for an AI chatbot using Flask, Next.js, and Node.js.
- Designed scalable database structures for optimized chatbot performance.
- Customized chatbot UI components, including dynamic color schemes in Dify AI, enhancing user experience and brand consistency.

Education Level

Universitas Teknologi Yogyakarta - **Sleman, Yogyakarta** Sep 2021 - Oct 2025 (Expected)

Bachelor of Computer Science

- Leadership and Organizational Involvement: Involved in various organizations on and off campus, contributing to various committee events and leadership roles.
- Competitions and Programs: Represented the university in national competitions and programs organized by Kemendikbudristek, including the prestigious PIMNAS.
- Assisted faculty in a research project on IoT-based crime detection using Raspberry Pi 5 and AWS Cloud. The system is designed for web integration using the Next.js

SMAN 1 Anjatan - **Indramayu, Jawa Barat** Jul 2018 - Jun 2021

High School Diploma in Natural Science

- Website Development Training: Attended training sessions organized by the local government, gaining foundational skills in HTML, CSS, and JavaScript.
- Teaching OSN Students: Assisted students in preparing for the National Science Olympiad (OSN) in computer science, focusing on algorithmic thinking, problem-solving, and programming using Pascal as the primary language.

Organisational Experience

Robotika UTY - **Sleman, Indonesia** Sep 2022 - Sep 2023

Vice Chairman

Robotika UTY is a Student Activity Unit (UKM) at Universitas Teknologi Yogyakarta, dedicated to developing students' skills in robotics and fostering interest in the field.

- Leadership and Coordination: Supervised and coordinated the activities of members and board members to ensure smooth organizational operations.
- Event Planning and Execution: Designed and organized educational programs and events aimed at enhancing members' technical and problem-solving skills in robotics.

Bangun Pendidikan Indonesia - **Jakarta, Indonesia** Apr 2022 - Sep 2022

Staff Research & Data Analyst

Early in my university years, I joined an organization called Bangun Pendidikan Indonesia, a national student organization. I was part of the Data Analyst Department, specifically as a staff member in the Research and Data Analyst Division

- Educational Research Planning and Data Collection: Responsible for organizing and conducting educational research, including data collection and surveys, to support our initiatives.
- Data Processing and Analysis: Analyzed the collected data and communicated key research findings on educational topics to help inform our programs and initiatives.

Skills, Achievements & Other Experience

- **Achievements** (2024): PIMNAS Finalist & PKM Grant Recipient.
- **Achievements** (2024): Finalist at Technocorner IoT Competition UGM.
- **Achievements** (2021): Programmer - Lembaga Sertifikasi Profesi Informatika.
- **Achievements** (2021): Digital Talent Scholarship - AI for Future Workforce Associate AI Analyst.
- **Hard Skills**: AI & Machine Learning: TensorFlow, PyTorch, SKLearn, Keras, Hugging Face, Deep Learning, Computer Vision, ONNX.
- **Hard Skills**: Programming Languages: Python, JavaScript (Node.js, Next.js), SQL, Non SQL.
- **Hard Skills**: Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn.
- **Hard Skills**: Big Data Tools: Dask, Xarray, Google Cloud, AWS.
- **Hard Skills**: NLP: Natural Language Processing, LLMs, NLTK, Embeddings, Generative AI.
- **Hard Skills**: IoT & Edge AI: Raspberry Pi 5, IoT Development, Embedded AI.
- **Soft Skills**: Leadership, Problem-Solving, Collaboration, Communication.
